Installation

To Assemble your Concealed Display Mount, remove the two screws holding the Valentine One display adapter in place and insert them into the back of your concealed display unit minding the orientation. Once inserted, reinstall the display backer unit using the two screws originally removed. Final installation should look like the image above. Install inside your vehicle at the bottom left of the screen to match the images below.

We are not affiliated with, collaborating with, or endorsed by Valentine One. This product is a 3D Printed, custom designed accessory.

If you have any questions please feel free to reach out via the platform you made your purchase on or via email at hello@Bartallama3D.design and we will be happy to assist you.
